Subject: RE: Need Assistance: Program Request for Comms Plan on oil and gas general permit

Carmen,

I got the go ahead. We can notify congressional offices. Please see below.

EPA Region 6 is proposing to reissue the National Pollutant Discharge Elimination System (NPDES) General Permit No. GMG290000 for existing and new sources and new dischargers in the Offshore Subcategory of the Oil and Gas Extraction Point Source Category (40 CFR Part 435, Subpart A), located in and discharging to federal waters in the Gulf of Mexico offshore of Louisiana and Texas. Notice of the proposed permit was published in the Federal Register on July 22, 2022, starting a 60-day public comment period that ends September 20, 2022. A public meeting and a public hearing on the proposed permit are scheduled to be held virtually via Teams on September 1, 2022. The public meeting is scheduled to start at 5:00 pm CT and the public hearing is scheduled to start at 7:00 pm CT. Please visit <https://www.epa.gov/tx/forms/registration-form-virtual-public-meeting-and-virtual-public-hearing-outer-continental> to register to participate in the meeting and/or hearing. For more information on the public hearing and meeting and for proposed permit documents and how to provide comments, visit <https://www.epa.gov/npdes-permits/support-documents-npdes-general-permit-offshore-oil-and-gas-operations-western-gulf>.

If the GMG290000 permit is not reissued by September 30, 2022, it will be automatically Administratively Continued under 5 U.S.C. 558(c) and remain in force and effect until the effective date of a new permit for all permittees that were covered by the permit prior to expiration. New Notices of Intent (NOIs) cannot not be accepted for an expired general permit. Operators who anticipate needing new permit coverage for discharges that will start in the near term after September 30, 2022, may want to submit NOIs under the existing 2017 permit and obtain permit coverage prior to its expiration September 30, 2022 (suggest at least several days prior to September 30th) so they can operate under the Administratively Continued permit should the new permit not be issued by October 1, 2022.

Subject: RE: Need Assistance: Program Request for Comms Plan on oil and gas general permit

Good morning,

Thanks for the info Austin. Not sure if we will need a traditional comms plan, but more so a coordinated notification to congressional and EJ stakeholders.

Cary and Joe – can you work with Nichole on getting a general notification document (not a signed memo) to send. Joe can create a press release based on that. We could also just send the press release as our notification.

Let me know you all want to meet to discuss further.

Thanks,
Janie

Hey Janie - please see the request below for a comms plan and EJ outreach as part of this regional action. The issue has gotten interest from Senator Cruz's office. Is there someone on our team that's covering WD for comms plans? I'm stretched pretty thin right now and could use some assistance in someone taking the lead on this. Please advise.
